

Abdur Rahman M. Sayeed

Applied AI Engineer | Client Delivery & AI Workflow Architecture

Prospect Park, NJ | (201) 321-2235 | asayeed95@outlook.com | linkedin.com/in/asayeed95 | github.com/asayeed95 |

Portfolio: [abdur.ai/hire](#)

U.S. work authorized | No sponsorship required | Open to remote, NJ/NYC, and relocation

PROFILE

Applied AI engineer and client-delivery systems builder. I enter real businesses, learn the operator and owner constraints, and build the systems underneath them: prompt and system design, agent orchestration, browser automation, and AI-assisted development, on a practical enterprise IT foundation supporting multi-site teams and production systems.

CORE CAPABILITIES

Applied AI: AI system design, prompt engineering, agent orchestration, workflow and tool design, browser automation, AI-assisted development

Client delivery: customer discovery, requirements translation, technical delivery, product judgment, operator empathy

Engineering: TypeScript, JavaScript, React, Next.js, Node.js, Python, SQL, Git, REST APIs, Cloudflare Workers, Supabase, PostgreSQL

IT and operations: Microsoft 365, Active Directory, Microsoft Entra ID, Intune, Jira Service Management, Lansweeper, Power BI, QuickBooks

EXPERIENCE

One Asec LLC - Forward Deployed Engineer | IT & Business Systems Lead

Prospect Park, NJ (Remote) | 2020 - Present

Client engagements below are delivery phases within this role, most recent first.

Applied AI Products | September 2025 - Present

- Lead governed-context product strategy, workflow and interface design, system decisions, and implementation for AI-agent use cases on Mnemix.
- Build HeyCLI, a voice-oriented multi-session coding-agent orchestrator with an iOS-first client, authenticated WebSocket, and Node.js/TypeScript bridge.
- Design BrowseFlow, agent-agnostic browser automation with accessibility-tree perception, CDP-first control, approval queues, and run evidence; shape Dockerfile.ai for Dockerfile generation, explanation, and optimization.

Enterprise Retail IT Delivery | April 2024 - July 2025

- Delivered a retail IT subcontract for Vox Elements supporting ETRO Fashion US: 200+ users, 14 sites, and 500+ tracked assets across stores and headquarters.
- Administered identity, accounts, and endpoint policy across Active Directory, Microsoft Entra ID, and Intune; supported IBM AS/400 workflows.
- Tracked assets in Lansweeper, ran Cisco and RingCentral telephony and Jira triage, and coordinated cross-site escalation to keep retail operations running.

Automotive Business Systems & Growth | 2020 - 2024

- Built and operated the business and technology foundations for three automotive-service businesses through their growth stages: systems setup, finance workflows, IT, and web and marketing support.
- Implemented a multi-user QuickBooks environment and built Excel and Power BI dashboards for pricing, profitability, and cash-flow reporting.
- Automated financial reconciliation with Python and SQL; translated owner and operator constraints into working systems and day-to-day problem solving.

EARLIER EXPERIENCE

Vital Life - Financial Operations & IT Specialist

Ottawa, ON, Canada | January 2019 - January 2020

- Owned bookkeeping, budgeting, KPI, CRM, invoicing, and monthly reporting workflows while expanding the company's marketing and IT operating foundation.

EDUCATION & CERTIFICATION

University of Ottawa - B.S., Financial Mathematics & Economics, 2015 - 2019

Coding Dojo / Colorado Technical University - Cybersecurity Certificate, 24-week intensive, September 2023 - March 2024

CompTIA Security+ - issued July 2024
