

Abdur Rahman M. Sayeed

MASTER CAREER RECORD | BUSINESS SYSTEMS, IT & APPLIED AI DELIVERY

Prospect Park, NJ | (201) 321-2235 | asayeed95@outlook.com

linkedin.com/in/asayeed95 | github.com/asayeed95 | Portfolio: abdur.ai/hire

CAREER NARRATIVE

Systems and product builder who has moved from financial operations and business infrastructure into client-facing IT delivery and applied-AI systems. Built the operating layers that real businesses need—finance, reporting, CRM/invoicing, IT, marketing support, workflows, and product experiences—then applied the same operator-first approach to agent orchestration, browser automation, and AI-native product work.

CORE CAPABILITIES

Applied AI: AI workflow design, prompt/system design, agent orchestration, AI-assisted development, browser automation, human-in-the-loop controls, verification concepts

Engineering & product: TypeScript, Node.js, Python, SQL, React, Next.js, WebSockets, API integration, UX/product design

Business systems: technical discovery, process design, QuickBooks, CRM/invoicing, financial reporting, Excel, Power BI, marketing-support workflows

Enterprise IT: Microsoft 365, Active Directory, Microsoft Entra ID, Intune, IBM AS/400, Jira, Lansweeper, Cisco/RingCentral

PROFESSIONAL EXPERIENCE

Forward Deployed Engineer | IT & Business Systems Lead | One Asec LLC

Prospect Park, NJ / Remote | 2020-Present

Applied AI Products

September 2025-Present

- **Mnemix** — Lead product strategy, workflow and interface design, system decisions, and implementation for governed-context product work serving AI-agent use cases.
- **HeyCLI** — Build a voice-oriented, multi-session orchestrator for coding agents using an iOS-first client, authenticated WebSocket, and Node.js / TypeScript bridge.
- **Dockerfile.ai** — Shape product and implementation work for Dockerfile generation, explanation, optimization, warnings, and adjacent container-workflow intelligence.
- **BrowseFlow** — Design agent-agnostic browser automation with accessibility-tree perception, CDP-first control, approval queues, and run evidence.

Selected client delivery: ETRO Fashion US through Vox Elements

One Asec subcontract engagement | New York, NY | April 2024-July 2025

- At One Asec, delivered a retail IT subcontract for Vox Elements supporting ETRO Fashion US, serving 200+ end users across 14 retail sites and corporate operations.
- Administered Active Directory, Microsoft Entra ID, Intune, IBM AS/400 support workflows, Jira triage, Cisco/RingCentral telephony, and a 500+ asset environment tracked in Lansweeper.
- Coordinated issue triage and escalation across distributed locations, balancing the immediate operator problem with the need for a repeatable system handoff.

Selected client delivery: Automotive Business Systems & Growth

New Jersey | 2020-2024

- Built and operated the foundational business, technology, reporting, finance, IT, web/marketing, and daily operating systems for three automotive-service businesses, including Autoblitz LLC and Carfixed LLC.
- Worked directly from owner priorities to build practical systems and processes that supported launch, operations, decision making, and expansion.
- Created reporting and automation workflows using QuickBooks, Excel, Power BI, Python, and SQL; supported financial reporting, cash-flow tracking, vendor and operating decisions.

Financial Operations & IT Specialist | Vital Life

Ottawa, ON, Canada | January 2019-January 2020

- Owned core bookkeeping, budgeting, KPI models, CRM processes, invoicing, and monthly operations reporting.
- Expanded the company's marketing and IT operating foundation, connecting day-to-day financial information with practical systems for operations and growth.

Consular Services Internship & Support | Bangladesh Consulate General / Embassy Services

Jeddah, Saudi Arabia | High school period; continued Summer 2015

- Supported consular-services work during high school and continued during the University of Ottawa summer break in 2015.

EDUCATION & CERTIFICATION

University of Ottawa — B.S., Financial Mathematics & Economics, 2015-2019

Coding Dojo / Colorado Technical University — Cybersecurity Certificate Program; 24-week intensive, hands-on bootcamp, September 2023-March 2024

Hands-on labs: Kali Linux, Wireshark, Nmap, Snort, Burp Suite, vulnerability scanning, incident response, digital forensics, and penetration testing

CompTIA Security+ — Issued July 2024

Claim boundary: Product systems are presented as source-backed technical scope. This document does not claim customer adoption, production-scale deployment, revenue impact, cloud-architecture ownership, or model-training work without independent evidence.
